

Hello! This is a new release ↯.  
This is a separate file.  
They said [1].

```
sage: r,B = var('r,B')
sage: f = (x*r*B)/((1-x)^2 * (1-x*r))
sage: f.partial_fraction(x)
```

1  
2  
3

$$-\frac{Br^2}{(r^2-2r+1)(rx-1)}+\frac{Br}{(r^2-2r+1)(x-1)}-\frac{Br}{(r-1)(x-1)^2}$$

Sage can compute  $1+1=2$ .
